An Introduction To International Relations Theory
An Introduction To International Relations

International relations (IR) or international affairs (IA) — commonly also referred to as international studies (IS), global studies (GS), or global affairs (GA) — is the study of interconnectedness of politics, economics and law on a global level. Depending on the academic institution, it is either a field of political science, an interdisciplinary academic field similar to global studies ...

International relations theory is the study of international relations (IR) from a theoretical perspective. It attempts to provide a conceptual framework upon which international relations can be analyzed. Ole Holsti describes international relations theories as acting like pairs of coloured sunglasses that allow the wearer to see only salient events relevant to the theory; e.g., an adherent ...

International relations theory - Wikipedia

International relations: International relations, the study of the relations of states with each other and with international organizations and certain subnational entities (e.g., bureaucracies, political parties, and interest groups). It is related to a number of other academic disciplines, including political science,

Chapter Summary I. Introduction. The purpose of this historical overview is to trace important trends over time—the emergence of the state and the notion of sovereignty, the development of the international state system, and the changes in the distribution of power among states

The Historical Context of Contemporary International Relations
20th-century international relations, history of the relations between states, especially the great powers, from approximately 1900 to 2000. The history of the 20th century was shaped by the changing relations of the world’s great powers. The first half of the century, the age of the World Wars and the start of the Cold War, was dominated by the rivalries of those powers.

20th-century international relations | Britannica.com
Introduction. Today the world is more complex and unpredictable than ever before. Some say we live in a global disorder, in a chaotic international system, which even the most pessimistic ones were not able to predict after the end of the Cold War, since the current order is not unipolar, bipolar nor multipolar.
