A cultural landscape is defined as "a geographic area, including both cultural and natural resources and the wildlife or domestic animals therein, associated with a historic event, activity, or person or exhibiting other cultural or aesthetic values." There are four general types of cultural landscapes, not mutually exclusive: historic sites, historic designed landscapes, historic vernacular...

The Census of Agriculture is a complete count of U.S. farms and ranches and the people who operate them. Even small plots of land - whether rural or urban - growing fruit, vegetables or some food animals count if $1,000 or more of such products were raised and sold, or normally would have been sold, during the Census year. The Census of Agriculture, taken only once every five years, looks at...

A happy International Day of Peasant’s Struggle to you. Talking of which, I’m still struggling away trying to write my book about peasants while the rest of the farm crew are up in London protesting about government inaction on climate change, which means I’m having to do a bit of proper work as well for a change – all reasons why this blog is wallowing in the doldrums at the moment.

1. Introduction. Greenspace is usually, but not always, comprised of vegetation and associated with natural elements. There has been growing interest in greenspace research due to evidence that nature positively impacts human wellbeing (Frumkin, 2013, Taylor and Hochuli, 2015). This research is relevant to a range of disciplines, including the health and medical sciences, urban design and ...
