We, all of us, are rapidly running out of time. If the biosphere is not soon freed from the ongoing global climate engineering assault, there will very soon be nothing left to salvage of our once thriving planet. Photo credit: Oregon Air National Guard. If we are to have any chance of altering our current course in time to make a difference, the effort will take all of us.

The world has moved into a new and unsettling geopolitical phase. It is not just multipolar, but multiconceptual. There is no longer any assumption—as there had been in the post–Cold War phase, framed by so-called New World Order and Washington Consensus thinking—that norms and institutions exist towards which the world’s major powers might converge.

Alcohol and injuries: Emergency department studies in an international perspective, 2009. Alcohol-attributable injuries are of a growing concern to the public health community, with alcohol-related injuries such as road traffic accidents, burns, poisonings, falls and drownings making up more than a third of the disease burden attributable to alcohol consumption.

Malnutrition increases the risk of infection and infectious disease, and moderate malnutrition weakens every part of the immune system. For example, it is a major risk factor in the onset of active tuberculosis. Protein and energy malnutrition and deficiencies of specific micronutrients (including iron, zinc, and vitamins) increase susceptibility to infection.
