Oxford Handbook Of Critical Management Studies
Welcome to Oxford Medicine Online Supporting every stage in your medical career. Oxford Medicine Online is a digital platform hosting Oxford University Press' prestigious medical titles. This resource brings together authoritative texts by world-renowned authors available online for the first time.

This new fourth edition of the Oxford Handbook of Tropical Medicine is the definitive resource for medical problems in tropical regions, and in low-resource settings. Comprehensive in scope, and concise in style, it is fully revised and updated and includes brand new chapters on humanitarian crises, poisoning and envenoming, nosocomial infections, and antibiotic resistance.

Positive organizational scholarship (POS) is an umbrella concept used to emphasize what elevates and what is inspiring to individuals and organizations by defining the possibilities for positive deviance rather than just improving on the challenging, broken, and needlessly difficult. Just as positive psychology explores optimal individual psychological states rather than pathological ones, POS ...

Oxford University Press is a department of the University of Oxford. It furthers the University's objective of excellence in research, scholarship, and education by publishing worldwide.

EpiSwitch™ biomarkers based on chromosomal conformation signatures are a critical cog in personalised medicine. Technology to select the right drug at the right dose at the right time for the right patient.

The packaging of chromosomal DNA plays a critical role in the epigenetic regulation of the whole genome. It ensures effective storage, access to genetic information and its regulation by the complex protein machinery utilised in gene expression.

This handbook is designed to support effective participation by delegates in Committee activities. It updates earlier documents, which had been prepared in

Introduction. Ecocriticism is a broad way for literary and cultural scholars to investigate the global ecological crisis through the intersection of literature, culture, and the physical environment.

This chapter considers three trends evident in recent research on opera in the period 1900–1945. Scholars tend to situate the genre, as well as individual works and composers, in relation ...

Personality is the set of characteristics in the individual that account for recurring patterns of behavior, thoughts, and feelings. It has often been a focus of study in work settings because organizations seek to capitalize on individuals’ unique habits and propensities as distinct from their ...
