Testicular Tumour Guideline
Testicular Tumour Guideline
The aim of these guidelines is to present the current evidence for the diagnosis and treatment of patients with cancer of the testis. Testicular cancer (TC) represents 5% of urological tumours affecting mostly younger males.

EAU Guidelines: Testicular Cancer | Uroweb
The European Association of Urology (EAU) Guidelines Panel on Male Infertility has prepared these Guidelines to assist urologists and healthcare professionals from related specialties in the treatment of male infertility.

EAU Guidelines: Male Infertility | Uroweb
Key points. Testicular torsion is an emergency. It requires immediate referral to a Paediatric Surgeon (or local Surgeon depending on services available)

Clinical Practice Guidelines : Acute scrotal pain or swelling
The recommendations contained in these guidelines are a consensus of the relevant Provincial Tumour Team synthesis of currently accepted approaches to management, derived from a review of relevant scientific literature.

Pituitary adenomas are tumors that occur in the pituitary gland. Pituitary adenomas are generally divided into three categories dependent upon their biological functioning: benign adenoma, invasive adenoma, and carcinomas. Most adenomas are benign, approximately 35% are invasive and just 0.1% to 0.2% are carcinomas. Pituitary adenomas represent from 10% to 25% of all intracranial neoplasms and ...

The serum AFP level before treatment was measured in 174 of the 211 study patients. The AFP level of the patients with pure YST was similar to that of the patients with mixed YST having ≥50% of the YST component, however the level was significantly higher than in the patients with mixed YST having <50% of YST component (P < 0.01). Complete surgical staging was not done like a epithelial ...

Guideline on Prescribing of Gonadorelin Analogues and ...

Cancer staging is the process of determining the extent to which a cancer has developed by growing and spreading. Contemporary practice is to assign a number from I to IV to a cancer, with I being an isolated cancer and IV being a cancer which has spread to the limit of what the assessment measures.

Cancer staging - Wikipedia

Brain cancer symptoms. Headaches are often the first symptom of a brain tumour. The headaches can be mild, severe, persistent, or come and go. A headache isn't always a brain tumour but if you're worried, be sure to see your GP.
