The countdown begins - there are just over 24 hours left to get your hands on the first do-it-yourself bioengineering kit! The Amino, which originally began as a school project by Julie Legault out of the MIT Media Lab, is a kit made to encourage people to experiment with synthetic biology. So much of our life is created through bioengineering, and the Amino lets everyone from artists to ...

Art and Science of Health Promotion Conference. Our signature event is the annual Art and Science of Health Promotion Conference. The Conference was established in 1989 with the goal of narrowing the gap between research and practice by stimulating dialogue and engendering lasting relationships between practitioners and scientists and exposing them to thought leaders from corporate, clinical ...
Great! Art is an activity that can employ all the senses sight, sound, touch, smell, and taste depending on the activity. Children's brain synapses fire away as they experiment and create, squishing paint between their fingers, mixing colors and materials, or drawing from imagination or what they see in front of them.

There are two paramount differences between art and science. The first is that art is subjective while science is objective. The second is that art expresses knowledge, most often in the form of ...

Colour order systems in art and science Do you know Isaac Newton's Theory of Colour? Or maybe Goethe's? We present you with a total of 59 easy-to-understand, richly illustrated colour theories from the Antiquity to modern times: in short, a complete cultural history of colour written by Prof. Narciso Silvestrini and Prof. Ernst Peter Fischer.
